DETAILED ACTION

1. This office action is in response to the appeal brief filed on 10/25/05. The finality dated 04/21/05 is withdrawn and new ground rejection is moot.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 23-24 are rejected under 35 U.S.C. 102(e) as being anticipated by White et al. (US 6,829,471) (hereafter White).

Regarding claims 23-24, White discloses all the claimed subject matter including “balanced amplifier circuits for processing a multiple carrier linear amplifier radio frequency signal; and an intermodulation distortion identification and quantization circuit connected to said balanced amplifier circuits for receiving a sampled radio frequency signal; and a detector circuit for detecting the sampled frequency signal for quantization and nulling the intermodulation distortion”, “sample and hold” in Fig. 1, 2; Abstract; col. 4, line 16 to col. 8, line 17.

Allowable Subject Matter

4. Claims 1-22 are allowed.

5. Claim 25 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
